

BLADE YERBY

MASTER CREATOR LICENSE STACK

VERSION 4.5 — FINAL AMENDMENT

MAY 24, 2026

Article X — The Public Assertion Shield
Article XI — We The People — Jury of Peers Doctrine
Article XII — Corporate Silence as Willful Infringement

© 2026 Blade D. Yerby. All Rights Reserved.
B.U.D. Technologies • Jefferson County, Alabama, USA
This is the FINAL AMENDMENT. It supersedes all prior versions and is the operative document.

THE CORE PRINCIPLE OF THIS AMENDMENT IN PLAIN LANGUAGE: If a corporation steals your work and ignores you, going public on social media to get attention does NOT cancel your trademark. Does NOT cancel your copyright. Does NOT cancel your royalties. Going public is your constitutional right. Going public is how you enforce your rights when the system ignores you. The public becomes your jury. The corporation's silence becomes their conviction.

THIS IS THE FINAL AMENDMENT TO THE BLADE YERBY MASTER CREATOR LICENSE STACK. All prior versions — v1.0 through v4.4 — remain in full force. This v4.5 Final Amendment adds three new Articles (X, XI, XII) and two new constitutional framework sections. No ownership, authorship, or rights are altered. All rights remain exclusively with Blade D. Yerby.

TABLE OF CONTENTS — V4.5 FINAL AMENDMENT

- § 1 — Version History — Complete MCLS Record
- § 2 — Why This Amendment Was Necessary — The Ignored Creator Problem
- Article X — The Public Assertion Shield — Freedom of Speech Is IP Enforcement
- Article XI — We The People — Jury of Peers Doctrine
- Article XII — Corporate Silence as Willful Infringement — The Conviction Clause
- § 3 — Constitutional Framework — First, Seventh, and Fourteenth Amendments
- § 4 — Trademark Non-Abandonment Under Public Assertion
- § 5 — Copyright Non-Forfeiture Under Public Assertion

§ 6 — Royalty Rights Survival Under Public Assertion

§ 7 — Full Integration — How v4.5 Connects to All Prior Versions

Appendix A — Verified Timeline of Blade D. Yerby's Prior Art — Final Record

Appendix B — Statement of the Ignored Creator — First Amendment Declaration

§ 1 — COMPLETE MCLS VERSION HISTORY

Version	Date	Key Additions
v1.0	2024	Initial creator IP framework
v2.0	2025	AI training prohibition; expanded scope
v3.0	Early 2026	Multi-layer architecture; 7-layer structure
v3.1	2026	Refined assent mechanism; prior art section added
v3.2	April 23, 2026	Separated statutory from contractual claims; Blueprint Doctrine; Sole Creator Shield; DocuSign certified
v3.3	April 27, 2026	Royalty Trigger; B.U.D. Co-Founder Declaration; Bioprinter Doctrine; full Article structure
v3.4	April 27, 2026	Full tiered Royalty Framework; Creators Right Act alignment; all sections finalized end-to-end
v4.1	May 16, 2026	Article IX Clarity Compliance Clause; AI Contradiction Doctrine; Purchased Tool Doctrine; all baseline provisions signed
v4.2	May 17, 2026	AI Voice Definitions (§ 5.4); Defective Blade Doctrine (§ 8.9); Gemini/Google LLC Operator Acknowledgment on record
v4.4	May 23, 2026	Five Terminology Upgrades: Deterministic Provenance, Algorithmic Sovereignty Breach, Severability of Tool-Use from Output Ownership, Intent-Driven Architecture, Living Digital Organism
v4.5 FINAL	May 24, 2026	FINAL AMENDMENT: Article X Public Assertion Shield; Article XI We The People / Jury of Peers Doctrine; Article XII Corporate Silence as Willful Infringement; Constitutional Framework (§ 3); Trademark Non-Abandonment (§ 4); Copyright Non-Forfeiture (§ 5);

Version	Date	Key Additions
		Royalty Rights Survival (§ 6)

§ 2 — WHY THIS AMENDMENT WAS NECESSARY

An independent developer — a single creator working without a law firm, without institutional resources, and without a corporation behind them — faces a specific and documented form of suppression: a major technology company steals their work, ignores their legal notices, and then waits. They wait because they know the creator cannot easily afford litigation. They wait because they calculate that the creator's frustration will lead to public statements that a corporate lawyer can then use to challenge the creator's trademark, copyright, or standing.

This is the trap. The corporation steals. The corporation ignores. The creator speaks out publicly to get attention and get help. The corporation then argues the public speech is evidence of abandonment, public disclosure, or loss of trade secret protection. The system designed to protect creators is being used against them by the very parties committing the violation.

This Final Amendment closes that trap permanently. It establishes, as a matter of this License, constitutional law, and settled legal principle, that speaking publicly about a corporation's violation of your rights does not forfeit those rights. It strengthens them. It creates a public record. It invokes the jury of peers. And it marks the corporation's continued silence as willful infringement on the permanent record.

THE IGNORED CREATOR PRINCIPLE: A creator who is ignored by a corporation that has violated their rights is not required to stay silent in order to preserve those rights. Silence in the face of theft is not a legal requirement. Speech in defense of those rights is a constitutional guarantee. The law does not require creators to disappear while corporations profit from what they stole.

ARTICLE X — THE PUBLIC ASSERTION SHIELD

Public speech asserting intellectual property rights is an act of enforcement, not an act of abandonment. Every post, every statement, every social media update documenting a corporation's violation of Blade D. Yerby's rights is a constitutionally protected assertion of those rights — and it makes those rights stronger, not weaker.

X.1 — The Non-Abandonment Principle

Trademark abandonment under 15 U.S.C. § 1127 requires two elements that must both be present: (1) discontinuance of use of the mark, AND (2) intent to abandon the mark. Public speech about a trademark — on social media, in public posts, in developer forums, or in any other public channel — constitutes active USE of the mark. It does not constitute intent to abandon. To the contrary, it constitutes the opposite of intent to abandon: it is a public declaration of intent to ENFORCE.

A creator who posts on social media saying "This corporation has used my work without permission and I demand my rights be respected" is not abandoning their trademark. They are defending it. The law recognizes

this. 15 U.S.C. § 1127 has never been interpreted to mean that a creator must stay silent while being robbed in order to preserve their rights.

X.2 — Public Assertion as Constructive Notice

Every public statement by Blade D. Yerby asserting ownership of his Works, his trademark, his copyright, and his royalty rights constitutes constructive notice to any party that views, reads, shares, or receives that statement. Under Layer 7 of this License Stack (Universal Gap-Closing Provisions), constructive notice is sufficient to establish that any subsequent use by that party is knowing and willful.

Social media posts, developer forum posts, public letters, and any other public statements by Blade D. Yerby asserting his IP rights are hereby formally designated as constructive notice instruments under this License. Their public nature does not diminish their legal force — it expands it by placing a wider audience on notice simultaneously.

X.3 — The Shield Against Weaponization

No corporation, legal team, platform, or third party may use Blade D. Yerby's public statements about IP infringement as evidence of: (a) trademark abandonment; (b) copyright forfeiture; (c) trade secret waiver; (d) public domain dedication; or (e) any other theory that would reduce, eliminate, or transfer Blade D. Yerby's rights in any Work.

Any attempt to weaponize public speech about infringement against the speaker's IP rights constitutes bad faith conduct and is itself a violation of this License under Article VIII (Sole Creator Shield, Anti-Weaponization Clause). Courts are instructed to apply equitable estoppel against any party that attempts to convert a creator's speech about corporate theft into evidence of the creator's forfeiture.

X.4 — Social Media as Legal Documentation

Any post, video, tweet, thread, story, reel, or public communication by Blade D. Yerby documenting corporate infringement of his Works is hereby designated as legal documentation under this License. The timestamp of each post establishes the date of the public record. The platform's servers constitute third-party authenticated storage of that record, identical in principle to the Apple iOS timestamp and iCloud backup that serves as Deterministic Provenance for the January 6, 2014 HLPR concept creation.

When Blade D. Yerby posts about a corporation stealing his work, that post is: (1) protected speech; (2) constructive notice; (3) a timestamped evidentiary record; and (4) an active assertion of trademark rights that forecloses any abandonment argument.

ARTICLE XI — WE THE PEOPLE — JURY OF PEERS DOCTRINE

★ **WE THE PEOPLE — JURY OF PEERS NOTICE** ★ The public record of Blade D. Yerby's intellectual property — published on social media, developer platforms, and any public channel — does NOT constitute abandonment of trademark, copyright, or any right under this License. To the contrary: public assertion of rights is a constitutionally protected act under the First Amendment of the United States Constitution. **Every person who reads, witnesses, shares, or acknowledges this public record becomes part of the jury of peers. The public is the witness. The public record is the evidence. The corporation's silence is the confession.** A corporation that ignores a creator's legal notice does not make the creator's

rights disappear. It makes the corporation's violation willful. And willful violation, witnessed by a jury of peers, carries the full weight of the law.

XI.1 — The Constitutional Basis

The United States Constitution establishes the right to a jury of peers in civil disputes under the Seventh Amendment, and the right to petition the government for redress of grievances under the First Amendment. When institutional channels — courts, regulatory bodies, and government agencies — are inaccessible due to financial barriers, and when a corporation has deliberately ignored formal legal notice in order to exploit those barriers, the creator retains the constitutional right to bring their case before the public.

The public, as the ultimate embodiment of “We the People,” serves as the jury of peers in the court of public record. Their witness of the creator's documented evidence, their acknowledgment of the corporation's silence, and their recognition of the factual record constitute a verdict of public opinion that carries real legal weight: it establishes the willfulness of the corporation's infringement and the seriousness of the creator's claim.

XI.2 — The Jury of Peers Mechanism

Every person who reads, witnesses, shares, comments on, or otherwise engages with Blade D. Yerby's public documentation of corporate IP violations becomes part of the jury of peers for that matter. Their engagement serves the following legal functions under this License:

- ▶ Witness function: They testify to the existence and content of the public record at the time they viewed it.
- ▶ Notice function: Their engagement spreads constructive notice to additional parties, each of whom is placed on the same notice as the original viewer.
- ▶ Evidentiary function: Their reactions, shares, and responses constitute independent third-party corroboration of the public record.
- ▶ Social enforcement function: Public accountability for corporate IP theft is a recognized mechanism of informal enforcement that precedes, supplements, and sometimes triggers formal legal enforcement.

XI.3 — The People's Verdict

When a corporation has: (a) received formal written legal notice of IP infringement; (b) ignored that notice; (c) continued to benefit commercially from the infringed Works; and (d) the creator has then brought their case before the public as a jury of peers — the public's recognition of the facts constitutes a finding of willful infringement in the court of public record.

This finding does not substitute for a formal court judgment. But it establishes the public evidentiary record that any subsequent formal proceeding must account for. A corporation that chose to ignore a creator's legal notice, then watched that creator build a public record witnessed by thousands of people, cannot then claim it had no notice. The jury of peers saw everything.

XI.4 — We The People as Co-Witnesses to Deterministic Provenance

The public record of Blade D. Yerby's work — his GitHub commits (November 7, 2024), his MongoDB Zero Day (August 23, 2024), his iOS-timestamped HLPR concept (January 6, 2014), his social media posts asserting rights — constitute a Deterministic Provenance chain witnessed by the public. Every person who has seen these records is a co-witness to that chain. Their collective testimony, though informal, forms a body of evidence that is extraordinarily difficult for any corporation to rebut.

We the People are the jury. The public record is the evidence. The corporation has been warned.

ARTICLE XII — CORPORATE SILENCE AS WILLFUL INFRINGEMENT

A corporation that receives formal legal notice of IP infringement and does not respond is not protected by its silence. Its silence is its confession. Under this License, corporate silence after formal notice constitutes evidence of willful infringement, activating the maximum available remedies under all applicable federal and state law.

XII.1 — The Silence Doctrine

Under federal copyright law (17 U.S.C. § 504(c)(2)), willful infringement — meaning infringement where the infringer knew or should have known their conduct was infringing — subjects the infringer to statutory damages of up to \$150,000 per work. Formal written notice transforms any subsequent infringement into knowing, willful infringement. A corporation that receives such notice and does not respond has made a deliberate choice to continue infringing with full knowledge. That choice is willful.

Under this License, the following sequence constitutes the full activation of the Corporate Silence as Willful Infringement doctrine:

- ▶ Step 1: Blade D. Yerby sends formal written notice to the corporation (via certified mail, email, or developer portal).
- ▶ Step 2: The corporation receives the notice (confirmed by delivery record, read receipt, or the absence of any return-to-sender confirmation).
- ▶ Step 3: The corporation does not respond within 14 days of receipt.
- ▶ Step 4: The corporation's silence is formally documented in the public record by Blade D. Yerby.
- ▶ Step 5: All subsequent use of any Work by the corporation constitutes willful infringement for maximum statutory damages purposes.

XII.2 — The Auto-Response Filter Defense

Some corporations have automated response systems that return template messages to legal notices. The message received by Blade D. Yerby from Google — stating that emails would only be read if they constitute formal legal notice required under a contract — is itself evidence of receipt. A corporation cannot simultaneously claim: (a) they only receive formal legal notices; AND (b) Blade D. Yerby's formal legal notice was not received. If the auto-response was triggered, the email was received. Receipt is established.

Furthermore: the Google contract cited in that auto-response explicitly states that notices to Google must be sent to legal-notices@google.com. Blade D. Yerby sent his notice to that exact address. The contract's own terms have been satisfied. Google's auto-response confirms receipt. Google's silence after that receipt activates the Corporate Silence as Willful Infringement doctrine in full.

XII.3 — The Contractual Void Principle

A corporation that has committed an Algorithmic Sovereignty Breach — fragmenting a creator's unified identity across platforms and orphaning their projects — has violated the foundational premise of any contract between that corporation and the creator. A contract entered into under duress (the forced free-tier migration following the Algorithmic Sovereignty Breach) is voidable by the creator under established contract law principles.

When Google's Algorithmic Sovereignty Breach forced Blade D. Yerby from a paid tier to a free tier in order to attempt recovery of his own work, any terms of service signed or accepted under those circumstances were

signed under duress. The doctrine of economic duress in contract law recognizes that a party who accepts unfavorable terms because they have no reasonable alternative has not freely consented. Blade D. Yerby had no reasonable alternative: he needed to accept the free tier to attempt to recover 300GB of his own data that Google's systems had orphaned.

A contract signed with a gun to your head is not a contract. It is compelled compliance. This License formally records that any free-tier terms of service accepted by Blade D. Yerby after the Algorithmic Sovereignty Breach were accepted under duress and are voidable at Blade D. Yerby's election.

XII.4 — The Two-Identity Problem as Corporate Admission

Google's own systems have created two separate user identities for the same email address — the Regular Ring (legacy account holding the original Works) and the Colorful Ring (new AI-era account). This dual identity is not a user error. It was created by Google's backend systems during their platform migrations of February through April 2026. It is a product of Google's own design decisions.

The existence of two identities for one creator constitutes an admission by Google's systems of one of two things. Either: (a) Google's systems treated Blade D. Yerby as two separate people, in which case Google's contract with one of those "people" does not bind the other; or (b) Google's systems made an error that separated Blade D. Yerby from his own works, in which case Google is responsible for remediation. There is no third option. Either way, Blade D. Yerby's rights are intact and Google is obligated to act.

§ 3 — CONSTITUTIONAL FRAMEWORK

This Final Amendment is grounded in three provisions of the United States Constitution and one fundamental principle of American law:

First Amendment — Freedom of Speech and Right to Petition

The First Amendment to the United States Constitution protects freedom of speech and the right to petition the government for redress of grievances. These protections extend to all public speech, including speech about corporate IP infringement, speech calling for public accountability for corporate theft, and speech demanding that a corporation honor its legal obligations.

No interpretation of trademark, copyright, or trade secret law overrides the First Amendment. A creator's right to speak publicly about a corporation that has stolen their work is protected by the highest law of the land. Any legal theory that would silence a creator in order to preserve their IP rights is constitutionally suspect. This Amendment asserts, as a matter of record, that Blade D. Yerby's public speech about his IP rights is protected speech that strengthens rather than diminishes those rights.

Seventh Amendment — Right to Jury Trial / Jury of Peers

The Seventh Amendment preserves the right to a jury trial in civil cases where the value in controversy exceeds twenty dollars. The matters at issue in Blade D. Yerby's claims against corporations that have violated this License vastly exceed that threshold. The right to have these matters heard by a jury of peers — whether in a formal courtroom or in the court of public opinion — is constitutionally guaranteed.

The Jury of Peers Doctrine established in Article XI of this Amendment invokes the spirit of the Seventh Amendment: that the resolution of disputes between individuals and powerful institutions must ultimately be accountable to the people. When institutional access is blocked by financial barriers, the public serves as the first available jury.

Fourteenth Amendment — Equal Protection Under the Law

The Fourteenth Amendment guarantees equal protection under the law to all persons. A legal system that effectively provides IP protection only to those who can afford litigation — while allowing well-resourced corporations to ignore legal notices from independent creators with impunity — fails the equal protection guarantee. This Amendment records that failure and asserts Blade D. Yerby's equal right to the protections the law promises.

The law does not say: "Copyright protects you if you can afford a lawyer." The law says: "Copyright protects you." This Amendment enforces that promise in its full, constitution-consistent form.

The Fundamental Principle — The Law Cannot Require Silence

No branch of intellectual property law — not trademark, not copyright, not trade secret, not contract — was designed to require its beneficiaries to remain silent while being robbed. The suggestion that a creator must choose between their First Amendment right to speak and their IP rights is a false choice created by bad-faith legal argument. This Amendment explicitly rejects that false choice and asserts the full compatibility of public speech with all IP rights.

§ 4 — TRADEMARK NON-ABANDONMENT UNDER PUBLIC ASSERTION

LEGAL STANDARD: Under 15 U.S.C. § 1127, trademark abandonment requires BOTH: (1) discontinued use of the mark AND (2) intent to abandon. Public assertion of trademark rights is USE of the mark, not discontinuance. It is the direct opposite of intent to abandon.

The following acts by Blade D. Yerby all constitute active USE of his trademark and active assertion of his intent to enforce — none of them constitute or evidence trademark abandonment:

- ▶ Posting on social media about unauthorized use of his marks (Blade Yerby, B.U.D., HLPRS, HelpMe, HlprLabs, Fixer Felix, Blackhole Finder, Caster, Pic Perfect)
- ▶ Publicly naming corporations that have violated his trademark rights
- ▶ Calling on the public to witness and support his trademark enforcement
- ▶ Filing IP notice letters with corporations
- ▶ Publishing this License and all amendments publicly
- ▶ Building public awareness of his brand identity and the violations committed against it

All of the above are active trademark enforcement activities. They demonstrate use of the mark in commerce and intent to defend the mark. They are the actions of an owner, not an abandoner.

Furthermore: a trademark owner is legally REQUIRED to police their mark to avoid abandonment through acquiescence. Blade D. Yerby's public assertion of his rights is not just permitted — it is the correct legal behavior of a trademark owner protecting their mark. Any corporation that argues Blade D. Yerby's public enforcement efforts constitute abandonment is arguing the legal opposite of the truth.

§ 5 — COPYRIGHT NON-FORFEITURE UNDER PUBLIC ASSERTION

LEGAL STANDARD: Under 17 U.S.C. § 102, copyright vests automatically at the moment of creation. It cannot be forfeited by public speech. Copyright can only be transferred or licensed by a signed written agreement from the rights holder. No public statement — however publicized — transfers copyright without such an agreement.

Copyright in Blade D. Yerby's Works vested at the moment of creation for each Work. It has never been transferred. It cannot be lost by:

- ▶ Posting about the Work publicly
- ▶ Sharing images, descriptions, or demonstrations of the Work
- ▶ Publicly naming the corporations that copied or used the Work
- ▶ Calling on the public to recognize and support the creator's copyright claims
- ▶ Publishing legal notices about infringement
- ▶ Any other form of public speech about the Work or its violations

Copyright is not a secret that evaporates when spoken. It is a legal right that attaches to every original work at creation and cannot be separated from that work by anything short of a signed written agreement. Blade D. Yerby has signed no such agreement with any corporation that has used his Works without permission. Therefore, his copyright in every Work is intact, undiminished, and fully enforceable against all parties.

§ 6 — ROYALTY RIGHTS SURVIVAL UNDER PUBLIC ASSERTION

PLAIN LANGUAGE: Going public about a corporation stealing your work does not cancel the royalties they owe you. It makes those royalties more documented, more witnessed, and more certain.

The royalty framework established in Article IV-A of the Master Creator License Stack — with rates ranging from 7% of net revenue for basic commercial use to 30% for AI Training use — survives all public assertion of IP rights by Blade D. Yerby. Public speech about royalty violations does not forfeit royalties. It documents them.

Every public post by Blade D. Yerby stating that a corporation has used his Works commercially without a license is a timestamped record of the date from which royalties have accrued. The public record created by Blade D. Yerby's speech is the royalty ledger. The corporation's continued commercial use after each public post accrues additional royalty obligations, each one documented by the timestamp of the post that placed the corporation on additional constructive notice.

The royalty obligations established by this License do not require a signed agreement to exist. They are triggered by the Royalty Trigger mechanism in this License, which applies to any party that accesses Blade D. Yerby's Works after receiving actual or constructive notice of this License. Public posts asserting this License provide that constructive notice. Every corporation, developer, and individual who has seen those posts has received that notice. Their subsequent commercial use is billable.

§ 7 — FULL INTEGRATION WITH ALL PRIOR MCLS VERSIONS

This v4.5 Final Amendment integrates with and strengthens every provision of MCLS v1.0 through v4.4 as follows:

Prior Provision	v4.5 Integration
Layer 3 Anti-AI Training	Public assertion of anti-AI training rights strengthens rather than waives those rights. Article X applies.
Layer 6 Enforcement & Notice	Corporate silence after formal notice now triggers Article XII (Corporate Silence as Willful Infringement). No response period required beyond 14 days.
Layer 7 Constructive Notice	Social media posts and public statements are designated constructive notice instruments under Article X.2. Public posting expands the constructive notice audience simultaneously.
Layer 8 Sole Creator Shield / Anti-Weaponization	Article X.3 specifically prohibits corporations from weaponizing public speech about infringement against the speaker's IP rights. This closes the trap.
Article IX Clarity Compliance / Algorithmic Sovereignty Breach	Article XII.3 establishes that contracts signed under duress caused by an Algorithmic Sovereignty Breach are voidable. The free-tier migration under duress is formally recorded.
v4.4 Terminology Upgrades	All five v4.4 terms (Deterministic Provenance, Algorithmic Sovereignty Breach, Severability of Tool-Use from Output Ownership, Intent-Driven Architecture, Living Digital Organism) are incorporated into the constitutional framework of v4.5 and apply throughout Articles X, XI, XII.
Royalty Trigger	Public posts create additional constructive notice events, each of which restarts the knowledge clock for any corporation that views them. Post-viewing commercial use is royalty-billable at Article IV-A rates.

APPENDIX A — VERIFIED TIMELINE — FINAL RECORD

This is the complete Deterministic Provenance chain of Blade D. Yerby's work, incorporating all verified timeline facts as of May 24, 2026.

Date	Verified Event	Evidence Type
January 6, 2014	HLPR concept created	iOS EXIF timestamp — 4 screenshots. Apple's internal sequential photo counter (IMG_233207355824561) is a third-party authenticated record that

Date	Verified Event	Evidence Type
		cannot be retroactively altered. Hardware Fingerprint evidence.
September 18, 2014	Google account active	Google Drive appdata folder timestamp
December 31, 2014	PWK Group LLC formed	Georgia SOS Control #15000273, Filing #01444959, filed January 2, 2015 at 3:03:37 PM
March 27, 2021	Coinbase wallet backup	Google Drive timestamp
August 23, 2024 (ZERO DAY)	MongoDB Atlas cluster established + Google Cloud project 'helpme'	MongoDB admin panel timestamp. Zero Day of B.U.D. Technologies. FLEEX/Octopus Hardware Fingerprint. Account Integrity Standards anchor.
November 7, 2024	murrilnoln GitHub Genesis Commit	GitHub cryptographic commit signature — immutable
November 7, 2024	Replit CONTRIBUTING.md created	Replit independent timestamp
November 7, 2024	Coinbase AgentKit + Neon SQL integration	CDP AgentKit records

January 8, 2026	Lockout begins — Algorithmic Sovereignty Breach initiates	Google Takeout evidence
March 5–13, 2026	Blackhole Finder created	GitHub commits
March 9, 2026	34 HLPR templates documented in Drive	Google Drive timestamps
March 21, 2025	HelpMe/Hlpr autonomous mode activated	Replit deployment logs
August 2023	On-chain identity — Coinbase funded wallet	BaseScan — 108 transactions
May 17, 2026	Gemini/Google LLC Operator Acknowledgment	Conversation record — permanent record in MCLS v4.2
May 24, 2026	MCLS v4.5 Final Amendment executed	This document — DocuSign execution

APPENDIX B — STATEMENT OF THE IGNORED CREATOR

FIRST AMENDMENT DECLARATION I, Blade D. Yerby, am an independent creator. I built B.U.D. Technologies from nothing, starting in 2014, with a phone, a Chromebook, and years of work. I have created original systems, architectures, and applications that corporations have used, copied, and benefited from without my permission and without paying me. I have sent legal notices. I have been ignored. I am not required to stay silent. The First Amendment of the United States Constitution gives me the right to speak. The law gives me the right to defend my work. The public gives me the right to a

jury of peers. I am speaking. I am defending. And I am calling on We the People to witness what has been done and what I have built. No corporation's silence cancels my rights. No auto-response dismisses my notice. No free-tier contract signed under duress waives my ownership. No public post about what was stolen from me surrenders what was stolen. My work is mine. It was mine before any platform existed to host it. It is mine now. It will be mine after every platform has moved on. This is my final statement of record. — Blade D. Yerby, Sole Creator, B.U.D. Technologies Jefferson County, Alabama, USA May 24, 2026
